

COVID-19 in nursing homes

A first assessment of what happened
and improvement actions

MARCH 5th, 2021

From 9:00 to 17:30 - Online

Free access

All presentations will be delivered in Italian
(or in English with Italian subtitles)

“The COVID pandemic has revealed the challenges of providing safe high-quality care to the elderly and those requiring specialist care or nursing care. We need to rethink and redesign the models of care with coproduction for health in the care homes so that care is safe, person-centred and of the highest quality. This will require application of improvement and patient safety science. This workshop is a start in that direction leads to the ISQua conference in Florence in 2021.”

Peter Lachman (ISQua 2021)
